### **About Vecima Networks**

Vecima Networks Inc. (TSX:VCM) designs, manufactures and sells products that enable broadband access to cable, wireless and telephony networks. Vecima’s hardware products incorporate original embedded software to meet the complex requirements of next-generation, high-speed digital networks. Service providers use Vecima’s solutions to deliver services to a converging worldwide broadband market, including what are commonly known as “triple play” (voice, video and data) and “quadruple play” (voice, video, data and wireless) services. Vecima’s solutions allow service providers to rapidly and cost-effectively bridge the final network segment that connects the system directly to end users, commonly referred to as “the last mile”, by overcoming the bottleneck resulting from insufficient carrying capacity in legacy, last mile infrastructures. Vecima’s products are directed at two principal markets: Converged Wired Solutions and Broadband Wireless. The Company has also developed and continues to focus on developing products to address emerging markets such as Voice over Internet Protocol, fibre to the home and IP video.
